

I FLY THE MU-2(S) BECAUSE...

“ Frankly I think if we didn’t have the MU2’s right now our business would be hurting. They give us a price point advantage with the cost of the aircraft, the maintenance cost, and the fuel efficiency. They allow us to provide really quality and safe service to our clients at a price they can afford. ” – Chuck Clayton, *MU-2 Pilot*

Chuck Clayton flies businesspersons in his four MU-2’s for one-hundred-twenty-five-companies. He runs Chartaire out of Maquoketa, Iowa.

Chuck’s air charter operation is his third career. He’s been “Airborne” in the military and with US Army Special Forces, a bank president and now is following his dream as an airborne businessman and pilot. He gives back to his community and flies kids free from Boys and Girls Clubs around the country.

“I like the comfort the MU-2 provides our clients. For instance, we have a company that we fly for a lot, and the CEO gets in the airplane and says ‘wow I like these airplanes, these airplanes are comfortable, it’s just like sitting in a recliner at home.’ ” – Chuck Clayton – MU-2 Pilot
