

## I FLY THE MU-2 BECAUSE...

**“...the MU-2 is fast and economical and I believe I can provide “can-do” answers to more mission requests than I could in any other plane.” – Earle Martin , MU-2 Pilot**

**When Earle Martin is not flying his Mitsubishi MU-2 turboprop Marquise for his Houston charter business he enjoys taking trips with son Grant and the rest of the family for excitement and pleasure.**

Earle owns Houston's Mid-Coast Charter. He has been flying since the '70's, has owned a number of planes, but vows never to own anything now but an MU-2. He left his law practice with one of the nation's most prestigious firms to realize his dream of being a full-time pilot. Earle's success is based on his ability to make the right decision for his family and his business.

*“The MU-2 is the very safest plane in its class, with the most structural integrity, reliability, and responsive performance whether wanting to accelerate or decelerate instantly.” – MU-2 Pilot Earle Martin*
